

Support at Highgate House provides appropriate support and liaison with local professionals and organisations focused around the ten outcomes of the **Mental Health Recovery Star**:

The staff team understand that continuity of support enables service users to successfully live independently whilst knowing where to request help should they fall into crisis to avoid costly re-admission to hospital or residential care.

The skilled staff benefit from training and guidance from local specialist units, who suggest that recovery can be expected in at least 75% of individuals with alcohol related dementia, ranging from slight to complete recovery, with appropriate support.
